

Learn How Formatta Delivers Forms Optimization Solutions for Higher Education

Higher Education institutions face many challenges in automating and streamlining hundreds of forms to deliver improved self-service, increased regulatory compliance, reduction of paper usage, shorter response times for student and faculty requests and enhanced communications.

One of the key problem areas is forms business processes. A typical higher education institution uses hundreds of forms across all aspects of its campus including admissions, financial aid, alumni and human resources. Paper and early-generation e-forms business processes are labor intensive, slow, costly, and error prone.

Learn how Formatta is helping Higher Education clients and other organizations with forms optimization that reduces costs while improving service and satisfaction.

Macintosh®-based attendees

Required: Mac OS® X 10.4 (Tiger®) or newer

Learn How Formatta Is Enabling Healthcare Organizations To Drive Down Costs While Providing Better Patient Care

Today's healthcare providers face intense economic and competitive pressures. Clinics, urgent care facilities, and nursing homes are overwhelmed by inefficient and duplicative processes resulting from paper-based forms. The critical information trapped on paper does not efficiently make its way to the applications that need it most.

By optimizing forms-driven business processes for Healthcare with Formatta, your organization will run more efficiently and cost effectively. Formatta software helps healthcare organizations create competitive advantage through reduced costs, streamlined operations, compliance assistance and, ultimately, increased overall patient satisfaction. Formatta optimized e-forms allow faster response to patient, payer and provider requests.

Learn how Formatta is helping Healthcare organizations deliver forms optimization that reduces costs while improving service, satisfaction and compliance. We will cover 3rd-generation e-forms, direct data capture, open process management, and automatic business systems integration.
