

## **AnyDoc®INVOICE™ Named Top 10 Product for 2008 by ECM Connection**

**Tampa, FL — January 16, 2009** — AnyDoc Software, Inc., an industry-leading developer of automated document, data capture, and classification solutions, has been named among the Top 10 products of 2008 by ECM Connection for its accounts payable solution, [AnyDoc®INVOICE™](#).

A VertMarkets, Inc. subsidiary, ECM Connection is an online information portal for Enterprise Content Management (ECM) news and information. ECM Connection publishes a twice weekly newsletter with subject matter ranging from ECM industry news, product information, editorial articles, upcoming ECM events, and more. Nearly 21,000 opt-in subscribers receive their electronic publications.

The ECM Connection "Top 10" is an annual recap of the most popular articles, products, new stories, and downloads based on customer response to their newsletters throughout the year. [AnyDoc®INVOICE™](#) ranked number five in the "Top 10" products out of the 495 products featured in 2008.

"We're honored for [AnyDoc®INVOICE™](#) to be recognized with this achievement. Accounting is by far one of the most responsive departments within organizations impacted by the benefits of eliminating manual data entry," said Sam Schrage, president of AnyDoc Software.

"Having the opportunity to educate visitors to [ECMconnection.com](#) on what automation can accomplish in measurable improvements such as time and cost savings is one of our main goals. To be included in this list for 2008 shows we are making grounds in educating the industry and changing the accounts payable landscape. We are definitely empowering companies to do more with less, particularly during the current economic environment," Schrage continued.

Implemented worldwide, [AnyDoc®INVOICE™](#) improves invoice processing efficiency for a wide variety of industries, by replacing tedious manual data entry with automated data capture. [AnyDoc®INVOICE™](#) automatically captures and processes the data needed from invoices, such as vendor information, purchase order numbers, line-item descriptions, product numbers, quantity, prices, terms, taxes, and more. Once the information has been captured, validated, matched (optional), and verified, data and images are ready for automatic transfer to nearly any financial database, ECM, ERP, document management and/or workflow system.

Recognized for its ability to locate data regardless of where it is located on the

page and capture line-item detail without the use of templates, [AnyDoc®INVOICE™](#) incorporates its own AnyApp™ technology to enhance efficiency and processing speed. Using a unique “memory” technology, AnyApp provides a better way to capture the common data that appears on all invoices—such as vendor information or total amount due—but are found in different locations in each invoice format.

**About [AnyDoc Software](#)**
